UDI-UNIQUE DEVICE IDENTIFICATION

- UDI live -
what does it offer
for health care providers

public accesible master data

patient safety & efficiency

UDI-one system different Codes

UDI Workshop November 24th 2016, 10:00-12:30, Hilton Metropole, London UK

Workshop UDI

for health care providers

UDI live – what does it offer what can be achieved

UDI

UDI is the worldwide project initiated by the International Medical Device Regulars Forum (IMDRF) and its member states, including Great Britain. The project is targeting to increase patient safety and efficiency of hospitals by unique identification of medical devices and IVDs. It includes the responsibilities of the suppliers for unique data on product and in the globally accessible data base but includes the responsibilities of the hospitals as well to use UDI to increase its efficiency and transparency.
The half a day workshop will discuss what UDI is and how it can be freely used. Participants will get the opportunity to learn how to get the optimum out of the UDI project on the long run.

Themes

- UDI for the world and free for use
- UDI Barcode, UDI RFID and UDI Master data
- Does UDI include enhancement of Barcode quality
- Does UDI harmonize Master data by public access
- How suppliers and hospitals manage UDI
- Application questions of the audience and answers to take away

UDI will effect me

> Supplier of Medical Device and IVD „Labelers"
> Health Care Providers
> Management of health care institutions
> Quality management
> IT - Management
> Procurement and administration

Workshop organizers

Organizer of the workshop is the cooperation of healthcare associations supporting UDI implementation actively. It includes the support association of the UDI accredited HIBC system „EHIBCC" and the Federation of the Dental Industries "FIDE". The speakers are experienced experts of IT, standardization and UDI implementation.

UDI Workshop
24.11. 2016

„UDI live – what does it offer"

Host: EHIBCC

10:00	**Welcome**
10:15	**UDI, the worldwide** project for enhancement of patient safety and efficiency ● Whom UDI concerns (supplier, hospital, …) ● Regulatory terms and schedules for UDI
10:40	**UDI is delivered as Barcode (and RFID)** ● UDI on **product, package and SKU** ● The two parts of an UDI code, the Device Identifier and the Production Identifier ● The Data content for product tracking & tracing ● The accredited coding systems
11:10	**GUDID, the Global UDI Database** ● The GUDID for the master data of medical devices and IVDs ● The harmonized data elements ● The data entry process
11:45	*Coffee break*
12:00	**GMDN** ● The Global Medical Device Nomenclature
12:20	Public access to the GUDID master data (live demonstration) ● Access and search through Internet ● Download of the master data and updates ● Automated access to individual product data through GUDID application interface
12:35	**Hospitals managing UDI** ● Example of a controlled process for UDI marked medical devices, e.g. surgical instrument, from supply through the point of use and further to following conditioning process prior to next usage
13:00	**Users applications and optimization of their processes.** Participants may pass over examples prior to or at the workshop for working out UDI conforming solutions, answers to questions for taking away.
13:30	End of the workshop

Your speakers and dialog partners:

Ton van Zijl	EHIBCC
Mark Wasmuth	GMDN
Gregor Stock	Legal Affairs, FIDE
Harald Oehlmann	EHIBCC
Heinrich Oehlmann	CEN TC225/WG1

Terms of participation

The workshop is free of charge in conjunction with written registration. The right of the participation originates after written confirmation by the organizer. Agenda might be subject to change.

EHIBCC – The European Health Industry Business Communication Council, www.ehibcc.com
FIDE - The Federation of the European Dental Industry, http://www.fide-online.org

Registration
